

# Navigable Waters of South Carolina

This map and associated list represent an inventory of rivers, streams and lakes determined to be navigable waters of the State of South Carolina. Navigability is determined by the South Carolina Department of Health and Environmental Control (SCDHEC) in accordance with the definitions of navigable waters contained in Section 49-1-10 and Regulation 19-450, **Code of Laws of South Carolina, 1976**, as amended. This inventory is based on extensive field inspections and other information available at the time of this printing. Modifications may be made in the future as additional information is obtained.

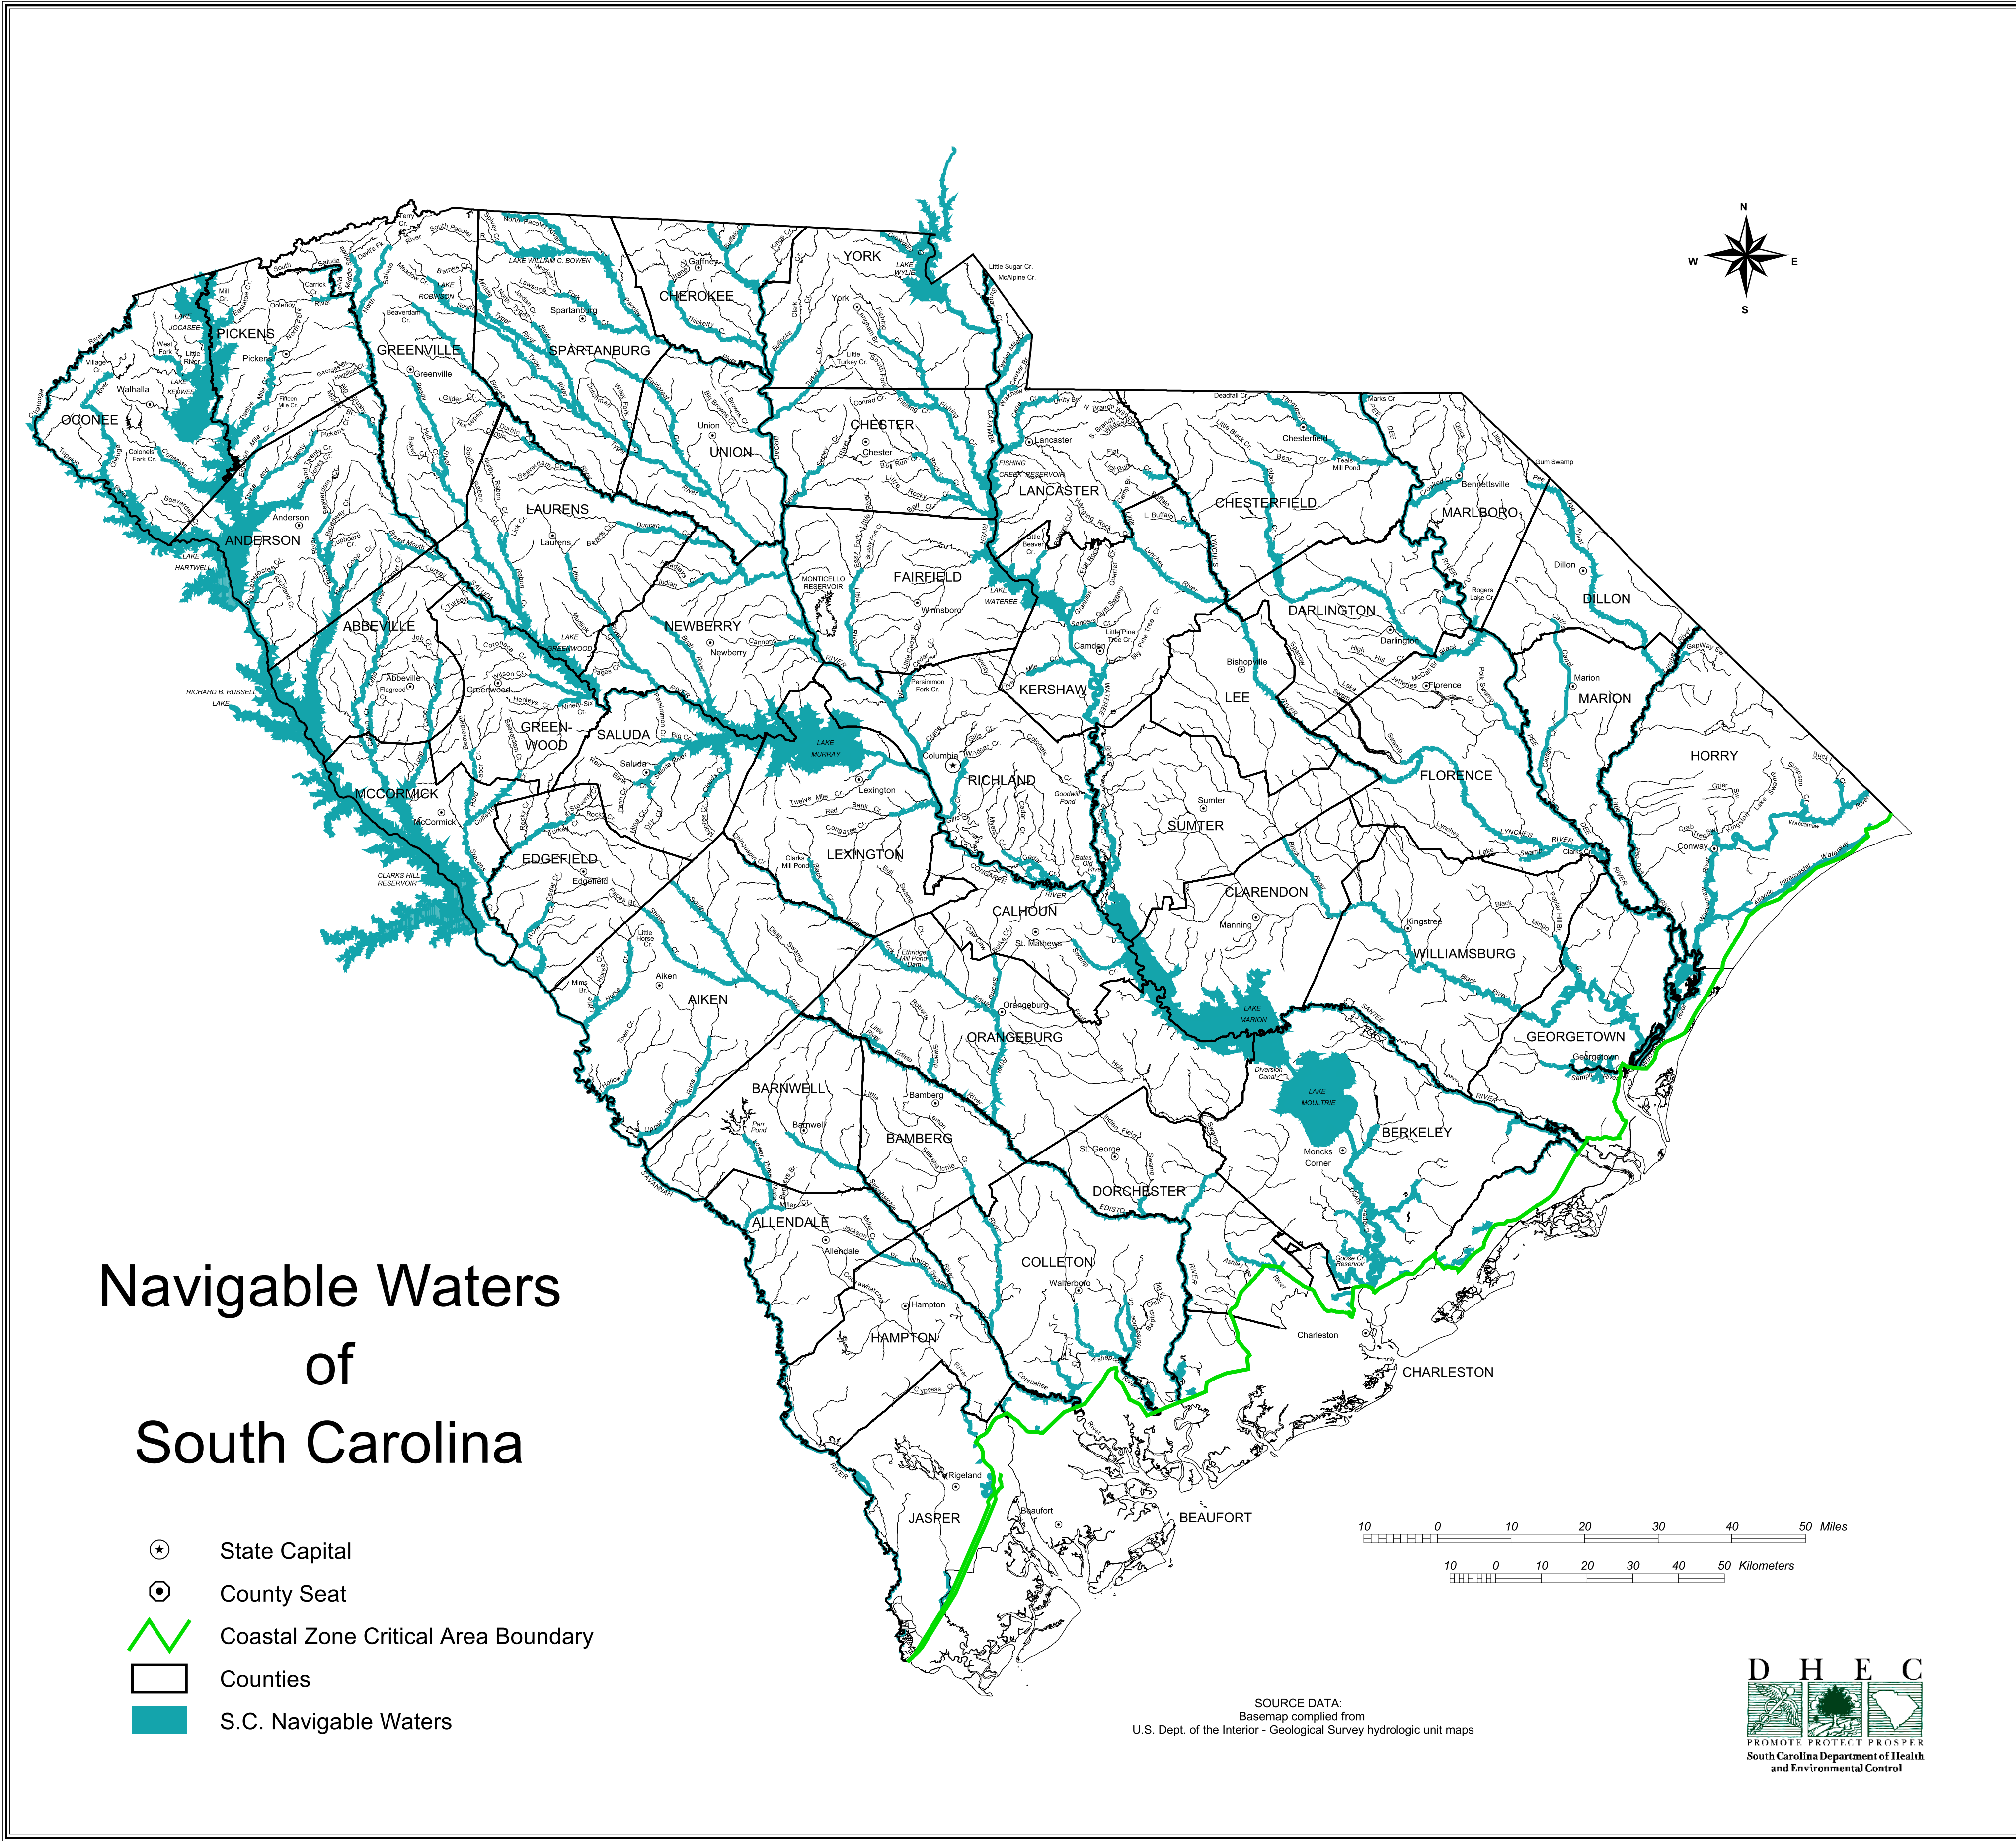

All freshwater navigable waters of the State as defined by the Regulations are subject to the permitting authority of SCDHEC. Any construction, excavation, filling or alteration activity occurring in, on, or over navigable waters requires a permit from SCDHEC prior to initiation of the activity. The basis of jurisdiction for the program is the State's claim of ownership of the beds of navigable waters and the navigational servitude over these waters. Statutory authority for the program is found in Sections 1-11-70, 1-11-75 and 49-1-10, **Code of Laws of South Carolina**, 1976, as amended. Regulations promulgated by SCDHEC to implement the program are codified at Regulation 19-450.

The permitting jurisdiction involves both tidal and non-tidal navigable waters. In tidally affected areas, permit jurisdiction includes those lands below the mean high water elevation, excluding saltwater areas under permitting jurisdiction of SCDHEC-Office of Ocean and Coastal Resource Management. In non-tidal navigable waters, permit jurisdiction includes lands below the ordinary high water elevation as defined in Regulation 19-450. Typical activities occurring in these waters which require a permit include, but are not limited to, construction of piers, docks, piers, boat ramps, bulkheads, moorings, bridges, dock structures, water intake structures and wastewater discharge structures, placement of fill and excavation of materials.

The majority of South Carolina water bodies have been investigated, and those determined to be navigable are so indicated in this inventory. However, some waters, primarily coastal plain swamp streams, have not been thoroughly inspected and are of uncertain status. Undoubtedly, some of these streams contain navigable waters that are not included in this inventory. Also, some portions of the lower extremes of navigable waters, which flow into navigable waters, may be non-navigable, which are in fact navigable. Many man-made canals and ditches which connect to navigable waters may also be considered navigable even though they are not included in this inventory. All designated navigable waters are within permitting jurisdiction.

Anyone planning to perform construction or alteration work in water bodies designated as navigable in this inventory or in waters of uncertain navigability status should contact SCDHEC prior to initiation of any work. The Department staff is available at the address indicated below to answer questions on the permitting program, make jurisdictional determinations and provide applications for required permits.

Columbia, South Carolina 29201

**South Carolina Navigable Waters**

Listed below are those water bodies determined by the South Carolina Department of Health and Environmental Control to be navigable waters according to State definition. The water bodies are listed by county with the lower and upper limits of permit jurisdiction within each county denoted. Tidal streams of the coastal counties are not listed individually but are classified generally as tidelands. Major inland lakes are listed individually, and smaller lakes, although not listed, are considered jurisdictional waters if located on a listed navigable stream.

Limits of Jurisdiction

County	Water Body	Lower Limits	Upper Limits			
Abbeville	Cathay Creek	Lower Limits	Upper Limits			
	Bayou de la Poudre	McMinn County Line	Upper Limits			
	Little River	McMinn County Line	Upper Limits
